Activity 09 — Build the Safety Question Bank and Quiz

Course: Mastering Articulate Storyline 360 for e-Learning Content Creation (`TGS-2024042308`) **Version:** v11 · 17 October 2026

Scenario

HarbourLink Logistics needs an 8–10 minute annual WSH refresher for frontline warehouse operators, including learners with low reading confidence. Build a picture-first module with short plain-English labels, narration, captions, purposeful interaction, keyboard equivalents and a five-question 80% practice quiz.

Objective

Create a five-question graded quiz with controlled bank coverage and 80% pass.

Supplied files and checkpoint

- Continue from/save as `HarbourLink-WSH-Checkpoint-09-YourName.story`.
- Shared runnable assets are under `../source/`.
- A completed `.story` solution is not supplied; build and test the project in Storyline 360 on Windows.

Detailed procedure

1. Open HarbourLink-WSH-Checkpoint-08 and Save As HarbourLink-WSH-Checkpoint-09-YourName.story; in existing scene `04 Quiz`, open placeholder `WSA-301 Safety Quiz`.
2. Choose Slides > Question Banks > Create Question Bank; name it `Safety Bank`.

Figure 9.1 — Step 2: Slides ribbon > Question Banks. Authentic Articulate tutorial/product guidance; example values may differ, so verify the named control in your own checkpoint.

1. Create five graded items: hazard recognition, control selection, reporting, emergency action and PPE.
2. For each item open Form View and enter the prompt, choices and correct response from `activities/source/quiz-content.md`.

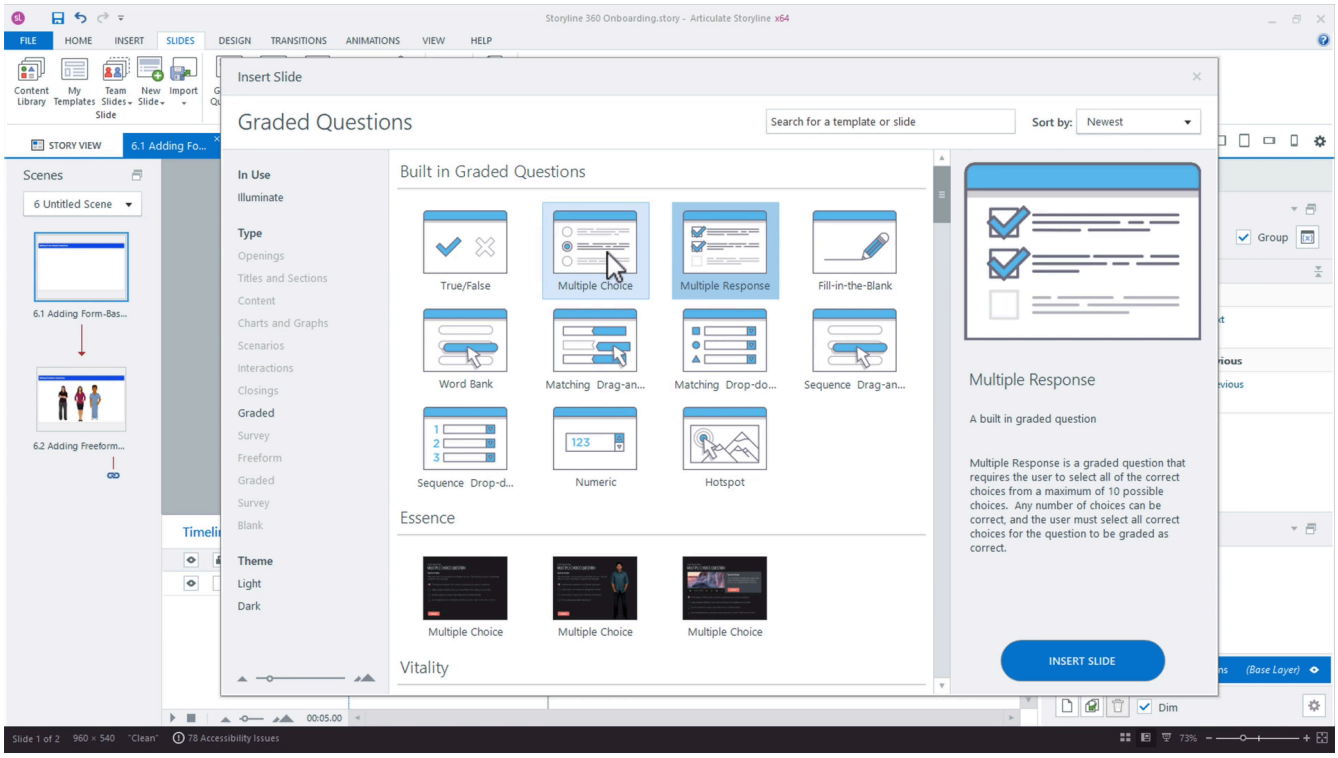

Figure 9.2 — Step 4: Authentic Insert Slide > Graded Questions gallery. Authentic Articulate tutorial/product guidance; example values may differ, so verify the named control in your own checkpoint.

1. Set points consistently and define attempts before styling.
2. Write Correct/Incorrect/Try Again feedback that names the safety consequence.
3. For multiple-response items add `Select all that apply` and use perceivable response states.
4. Tag item titles with the criterion name so coverage is auditable.
5. Choose Slides > Question Banks > New Draw from Question Bank; select `Safety Bank`, then replace the WSA-301 placeholder content with this draw slide so the Quiz menu entry opens the bank draw.

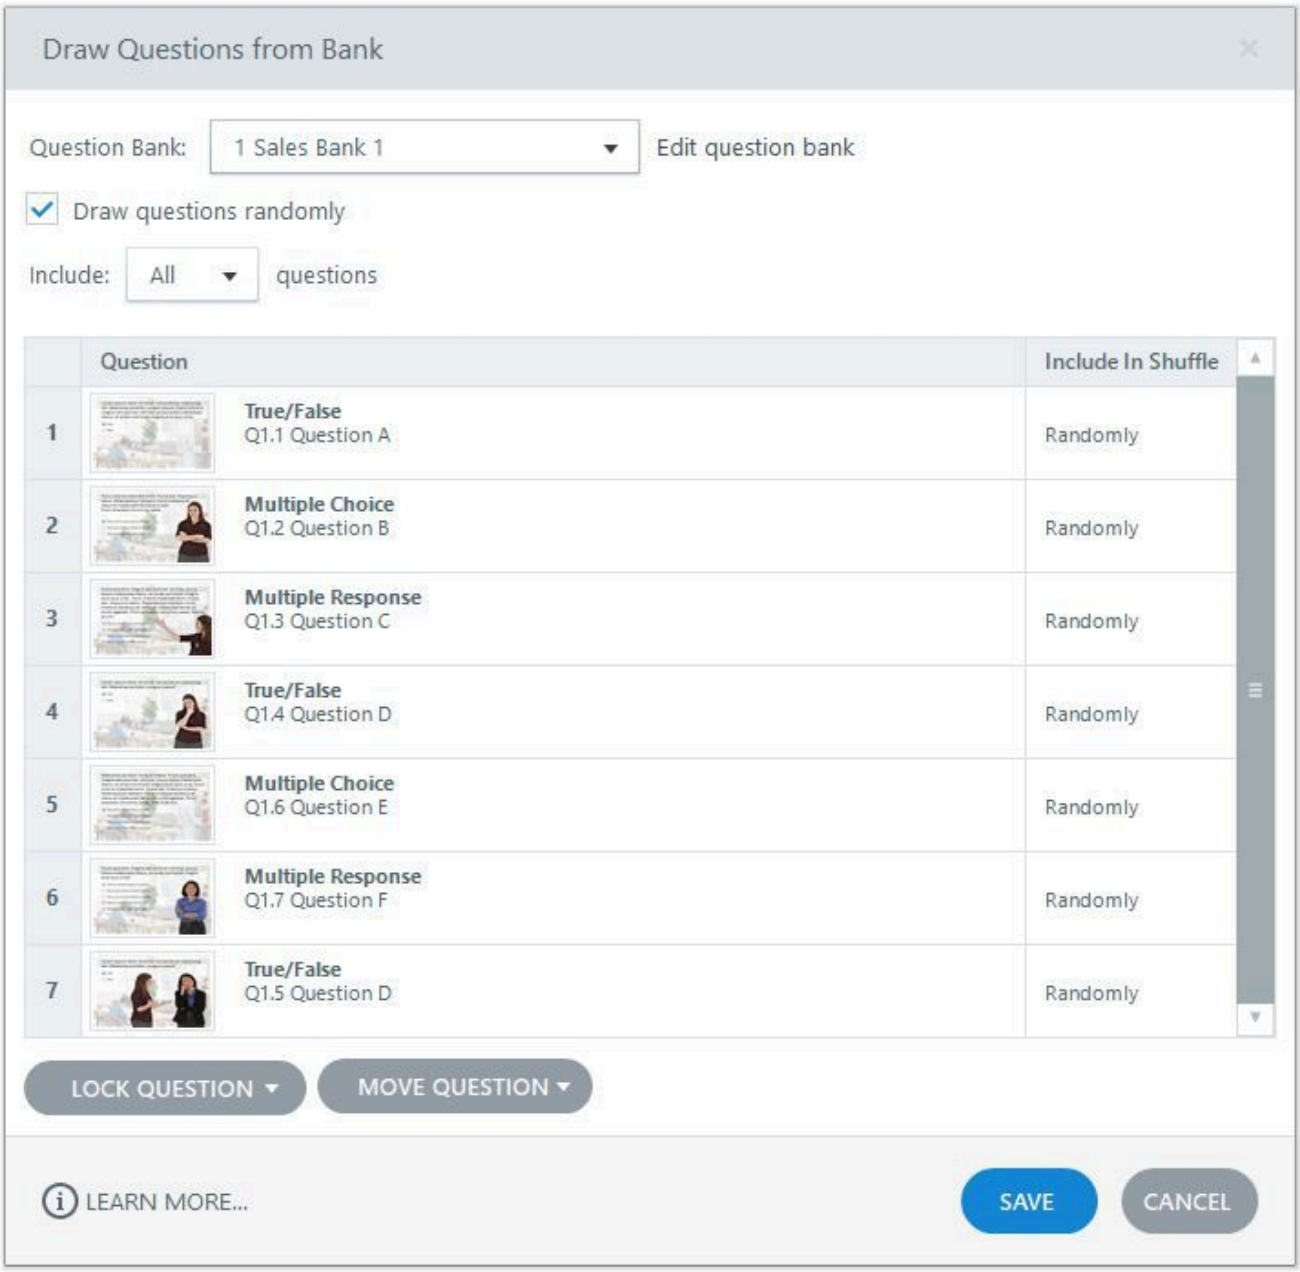

Figure 9.3 — Step 9: New Draw from Question Bank dialog. Authentic Articulate tutorial/product guidance; example values may differ, so verify the named control in your own checkpoint.

1. Enable Draw questions randomly, set Include to five, and mark every required criterion Always in Include in Shuffle.

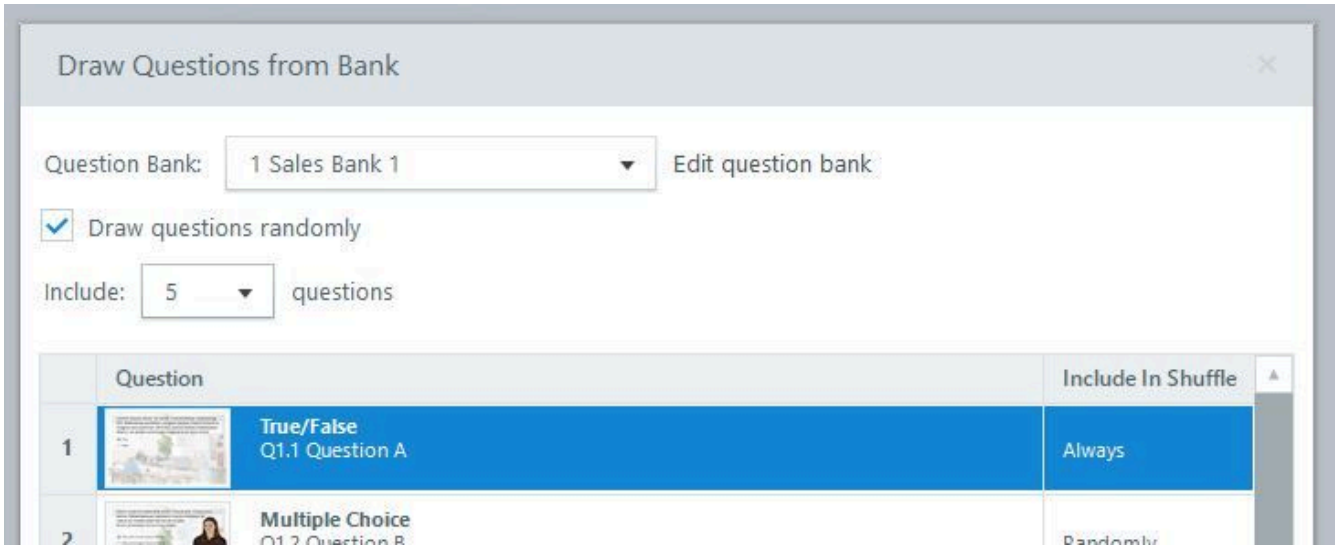

Figure 9.4 — Step 10: Include five; Always/Randomly shuffle controls. Authentic Articulate tutorial/product guidance; example values may differ, so verify the named control in your own checkpoint.

1. Open Focus Order for a representative item and remove decorative objects.
2. Preview two different answer sets and record expected raw score.
3. Verify no correct answer is exposed before Submit.
4. Review at phone-width player size for target spacing and readable feedback.
5. Save and capture bank contents, draw settings and one complete feedback path.

Evidence to retain

Retain the named .story checkpoint, the completed self-check table and one screenshot for each task showing the final state or setting that proves the acceptance criteria.

Acceptance criteria

- [ ] Five criteria are covered.
- [ ] Scoring is reproducible.
- [ ] Instructions and states are accessible.
- [ ] Answers are not leaked before submission.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
