Activity 14 — Independent Mini Capstone

Course: Mastering Articulate Storyline 360 for e-Learning Content Creation (`TGS-2024042308`) **Version:** v11 · 17 October 2026

Scenario

Create your own original 8–12 slide e-learning module on any suitable learning topic from your organisation, community or personal interests. Start from a blank project, write your own narration, build purposeful interactions and quiz, and publish a standards-compatible package. This developmental capstone is separate from HarbourLink and from the formal PP.

Objective

Independently create a small original e-learning module from a new blank project and present verified evidence.

Supplied files and checkpoint

- Create a new blank and save as `Capstone-YourName-v01.story`.
- Shared runnable assets are under `../source/`.
- A completed `.story` solution is not supplied; build and test the project in Storyline 360 on Windows.

Detailed procedure

1. Choose any suitable learning topic from your organisation, community or personal interests; do not reuse the guided HarbourLink module or a formal PP solution and write a one-page brief naming audience, performance need, three measurable objectives, delivery channel and accessibility constraints.
2. Create a new blank `Capstone-YourName-v01.story`; do not copy the WSA checkpoint file.
3. Storyboard 8–12 slides containing a menu, one purposeful hotspot interaction or accessible equivalent, layers, one variable gate, recorded or synthetic voiceover with matching captions or transcript, minimal on-screen text, a three-question graded quiz and a result slide.
4. Apply your own theme and masters, implement keyboard focus, captions/transcript where relevant, and test correct, incorrect, incomplete, retry, revisit and resume paths.
5. Publish one standards-compatible test package selected for your target environment and produce a two-minute demonstration plus a one-page release/test record.
6. Optional AI may assist ideation in a duplicate sandbox; retain a manual fallback and verify every output. This capstone is developmental practice and is not the approved formal PP assessment.

Evidence to retain

Retain the named .story checkpoint, the completed self-check table and one screenshot for each task showing the final state or setting that proves the acceptance criteria.

Acceptance criteria

- [ ] Original blank project and brief are evident.
- [ ] Required Storyline mechanisms work together.
- [ ] Accessibility and test evidence are complete.
- [ ] Publishing choice matches the target.
- [ ] Capstone is labelled separately from formal PP.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
